

**Export -**  
Displays a flyout menu containing options for creating files from your active Workspace (e.g., image files, PDFs and Postscript files, parts lists, and files in several other formats). See [Document Menus and Toolbar](#) for more information.

**Convert -**  
Convert your native CAD files directly to Actify .ACT3D files.

**E-mail -** Open a new e-mail with the current Workspace content attached as a .3D file.

**Print and Print Preview... -**  
Setup and print a copy of your document (s). See [Working with Documents](#).

**Print Region -**  
Print a selected region of your document.

**Exit (or ALT+F4)** - Close your files and end the SpinFire Ultimate session.

View

**Event Log** - A useful tool if ever you need support with a troublesome file. See [Working with Documents](#) for more information.

**Full Screen (or F11)** - Expand the SpinFire Ultimate window to fill your display.
